

The Casino Theater is available for rentals. Hold your next dance recital, play, concert, business presentation, or social event in our historic facility. The theater is equipped with professional sound and lighting systems. We also feature a motorized screen with a video projector.

Sound System - 10,000 watt 8-amplifier system driving two side speaker cabinets consisting of low, median and high range speakers and sub-woofers and a center-stage speaker cluster. A four-channel stage monitor system is located backstage on a wheeled rack. A 32-channel stage snake is installed from stage left to the sound console located in the rear of the auditorium. The sound console (Beringer) is a 32-channel board with channel eq's and multiple "sends". A multi-channel processing rack is also available and can be patched into any desired channel for limiting and compression functions. One handheld wireless mic is available as well as a number of wired microphones. The stage is wired to hang five overhead choir microphones.

Light System - The lighting system consists of two separate DMX universes. One universe is used to control the conventional stage lights and is controlled by a MC-7024 24 channel NSI light board. There are sixteen overhead Altman 65Q fresnels, four front-of-house Altman elipsoidals, two LED elipsoidals, and four Par 56 lamps. The other DMX universe controls LED "smart lights". These are controlled by a computer running MEGALite software. There are eight Charvet Intimidator 350 Beam moving heads installed overhead downstage. There are six Blizzard Puck Pro Zoom LED fixtures with variable beam width and a multitude of colors and effects installed overhead.

An in-house intercom system is installed to communicate between the sound board, light board, stage left, stage right, and lobby.

Optional Ticketing Service - We offer our on-line ticketing service to our rental clients. This service gives your attendees the convenience of purchasing tickets on-line with the options of printing the tickets on their own computer and printer, having tickets mailed directly to them, or having the tickets on their wireless devices. Attendees will be able to select their reserved seats. This service is an additional \$100.
